HENTSCHEL HAMBURG WATCH MANUFACTORY

It is time for a very special watch. Handmade, individual and most exquisite. Luxury watches can be bought all over the world, but who wouldn't want to wear a watch that is unique and was made exclusively for him? If you consider the acquisition of a premium watch it is surely something special and not a mass produced article that you anticipate.

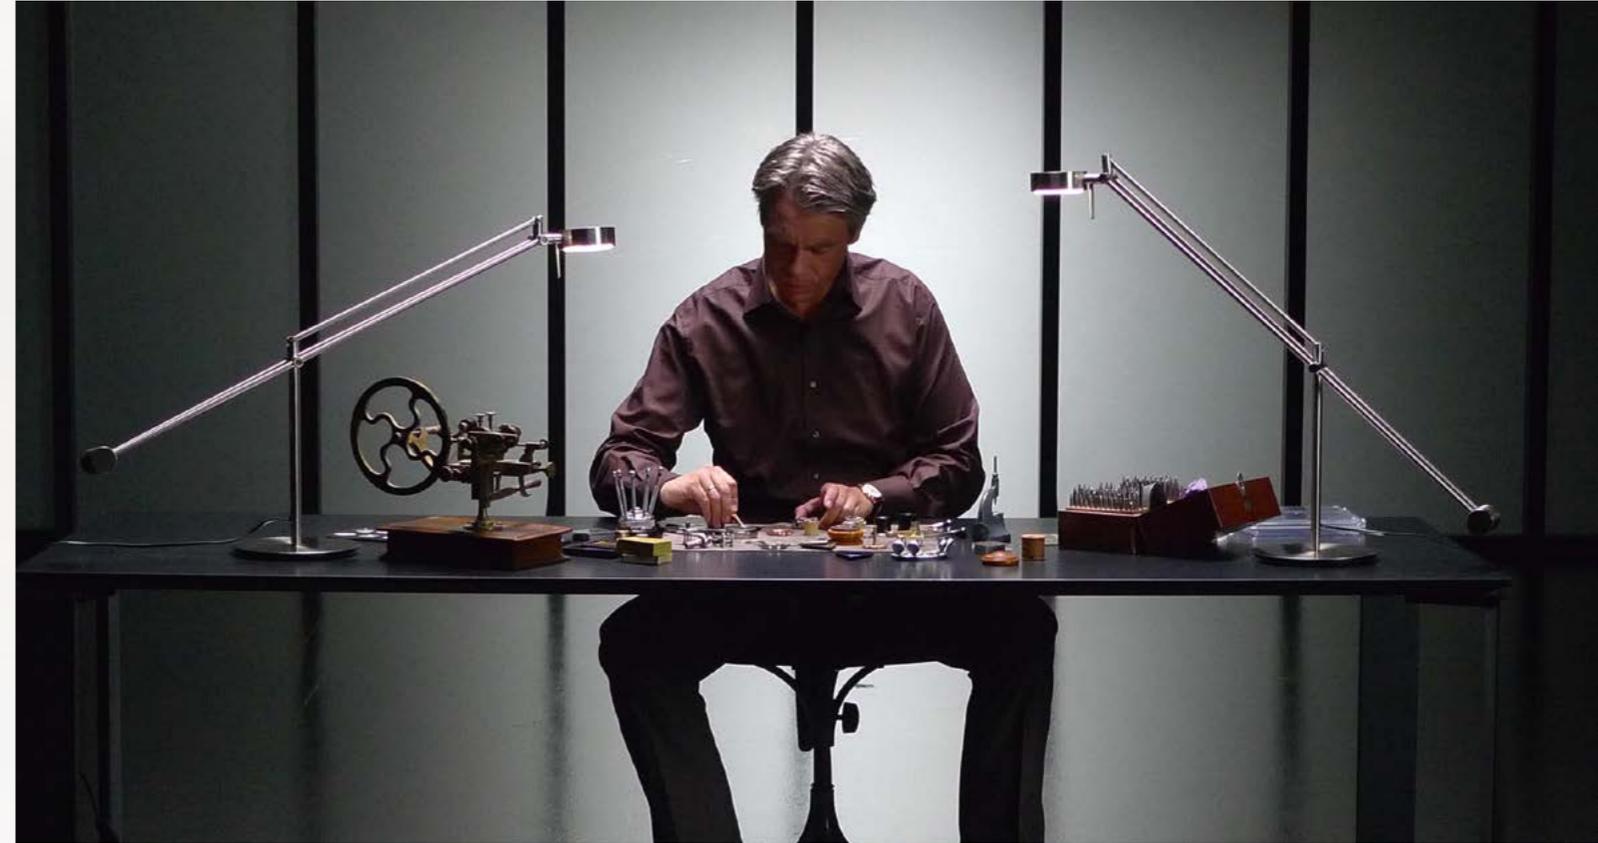

The unique pieces or limited series that come from our manufactory are elaborately made by hand and on order of our customers, so you can be sure not to find your watch on every other wrist. For extra flexibility every Hentschel watch comes with two straps with an integrated quick-change-system, that allows you to change the strap easily at home.

A HENTSCHEL watch doesn't show its exclusivity and value in a flamboyant and in-your-face way. Our watches are rather the epitome of classic elegance and Hanseatic understatement – values that are highly appreciated by our customers.

In this brochure we introduce the NEW H2 SPORT. Available in two case-materials, stainless steel and ships propellers bronze. Every new H2 is now equipped with our new manually wound manufactory movement HUW 1130 S.

The new H2 SPORT – casual – sporty – elegant:

The new H2 Sport is a class by itself and lives perfectly in between two worlds. It has a clear sporty note but still can't be compared to usual sport watches. It is comfortable ergonomic and radiates with elegance. The new H2 Sport offers a water and shock resistant case, made from stainless steel or non ageing bronze.

A class by its own, casual and elegant."

A CLASS OF ITS OWN

The NEW H2 SPORT is the best of both worlds – with a significant sporty note but hardly comparable to any other sports watch.

The NEW H2 SPORT impresses with its elegant and casual sportiness. It has the robust and water resistant HENTSCHEL H2 case but doesn't come with the bulkiness and weight of a divers watch. The dials of many sports watches are quite "busy" and cluttered too. Not

so the NEW H2 SPORT with its clear and easy to read dial that abandons any other unnecessary functions or indications deliberately.

The reason for its perfect wear comfort are the harmonious proportions of the brushed stainless steel case. The watch has a low profile to slip readily under any shirt cuff without getting caught. Its thickness is just a mere 8 mm and by this just half as thick as other sports watches. The engraved bezel gives the NEW H2 SPORT its discreet sporty note. It is fixed with four blued screws to the case and provides the adequate frame for the slightly domed dial with its raised indexes. In combination with the likewise domed sapphire crystal the NEW H2 SPORT appears exceptionally flat and three-dimensional at the same time. It is equipped with our new manufactory movement HUW 1130 S and is of course shock- and water resistant.

THE NEW H2 | SPORT

MANUFACTORY MOVEMENT HUW 1130 S

Exclusiveness doesn't stop on the inside: The new inhouse manufactory movement HUW 1130 S.

On the basis of the legendary Swiss Schild AS 1130 we have developed our latest manufactory movement. The curved bridges are newly constructed and are a reminiscence of the old pocket watch calibers from the early 20th. century. The swans neck regulator facilitates a precise regulation of the movement. Every component has been optimized with the emphasis on minimizing abrasive wear and the longevity of the wheels and the escapement. The new HUW 1130 S sets a new standard and combines robustness with precision.

HENTSCHEL HAMBURG – THE MOST PERSONAL WAY TO BUY A WATCH

There are times when you simply need something special. Often it is an important occasion or date which is the reason to think about a new watch for a cherished person or just for yourself.

HENTSCHEL watches are not just bought anywhere while you are on a shopping tour but the ideal way would be to buy it directly at our manufactory. On the other hand we have lots of experience in dealing with orders from abroad and have many happy customers outside of Germany.

Competent consultation: Ordering your own Hentschel watch is very much different to just shopping for a luxury watch “off the shelf”. Our consultation will guarantee you maximum competence, individuality and exclusiveness.

A personal relation right from the start: HENTSCHEL watches are not just simply bought on a whim. The majority of our customers order their HENTSCHEL watch after having talked to us on the phone, after e-mail communication or after they have visited us here in the manufactory in Hamburg.

CLASSIC TIMEPIECES FROM HAMBURG

A subtle distinction: In these times where most of the well-known watch brands are part of multinational corporate groups that produce their luxury goods on an industrial level, the decision for a handmade watch is a strong statement. Handmade and not just off the shelf as an expression of taste and personality.

The HENTSCHEL HAMBURG watch manufactory is a free and independent family business. We don't consider us a “watch brand” but a handicraft enterprise that has a close and personal contact with its customers.

Hentschel premium warranty: A HENTSCHEL watch is a companion for a lifetime and has our personal quality assurance – 63 months of guarantee. This sets a high standard in the watch trade in certitude and service.

A Hentschel watch is a watch for a lifetime. If a manufacturer wants to stay true to their word a well-made watch isn't enough. They also need an extensive and customer-oriented guarantee package.

The Hentschel premium-guarantee is unique. No other manufacturer offers their customers this amount of protection and service.

High quality even up to the smallest detail: All parts of a Hentschel watch are designed, manufactured by us or are built exclusively for us by German companies. We neither use parts made by other manufacturers or pre-made parts of so-called “private label assortment”. This is the factor that defines our high quality standard and guarantees the exclusive distinctiveness every Hentschel watch stands for.
